STUDENT TRANSPORTATION SERVICES

The school bus transportation provided pupils shall be in accordance with a plan adopted by the Board. Such a plan shall define the areas wherein pupils shall be eligible for transportation. Reasonable temporary exceptions may be made by the superintendent in established routes and transportation areas when necessary. Under normal conditions, bus service will be provided for all students who live outside the city limits of the town.

Bus routes shall be established so that an authorized bus stop is available within a reasonable walking distance of the home of every pupil entitled to transportation services. An exception to this may be made by the Board for those students who live great distances from school and from established bus routes, and because of this, are considered "isolated." Such action by the Board shall comply with regulations of the State Board of Education.

Any special education pupil who requires particular assistance in traveling to and from school may be granted special riding arrangements by the Board.
